APPENDIX 1.0: FLOWER GARDEN BANKS NATIONAL MARINE SANCTUARY REGULATIONS

Flower Garden Banks National Marine Sanctuary (FGBNMS) regulations (15 CFR, Subpart L, 922.122(a); 15 CFR, Subpart A, 922.3) lists activities that are prohibited or otherwise regulated within all three areas of the FGBNMS

(1) Anchoring and Mooring. The following activities are prohibited:

- Anchoring a vessel within the sanctuary.
- Mooring a vessel over 30.5 m (100 feet) in registered length on a sanctuary mooring buoy.

(2) Discharges. Regulations prohibit discharging or depositing any material or other matter in or into the sanctuary, with a few exceptions including:

- Fish, fish parts, chumming materials or bait used while fishing with conventional hook and line gear within the sanctuary.
- Clean effluent from an operable Type I or II marine sanitation device (MSD).
- Clean water generated by routine vessel operations (e.g. cooling water, deck wash down, and bilge water) excluding oily wastes from bilge pumping.
- Engine exhaust.
- In addition, it is required that vessel operators lock all MSDs in a manner that prevents discharge or deposit of untreated sewage.

(3) Diver Safety. All moored vessels engaged in diving activities at the FGBNMS must clearly exhibit the blue and white International Code flag “A” (“alpha” dive flag) or red and white “sports diver” flag when divers are in the water and remove it once all divers exit the water.

(4) Marine Mammals and Sea Turtles. Regulations prohibit taking any marine mammal or turtle within the sanctuary.

(5) Rays and Whale Sharks. Regulations prohibit killing, injuring, attracting, touching, or disturbing rays or whale sharks, except for incidental catch by conventional hook and line gear.

(6) Injury or Possession of Sanctuary Resources. The following activities are generally prohibited:

- Injuring or removing, or attempting to injure or remove, any coral or other bottom formation, coralline algae or other plant, marine invertebrate (e.g., spiny lobster, queen conch, shell, sea urchin), brine seep biota or carbonate rock within the sanctuary.
- Possessing within the sanctuary (regardless of where collected, caught, harvested or removed), any carbonate rock, coral or other bottom formation, coralline algae or other plant, or fish (except for fish caught by use of conventional hook and line gear).

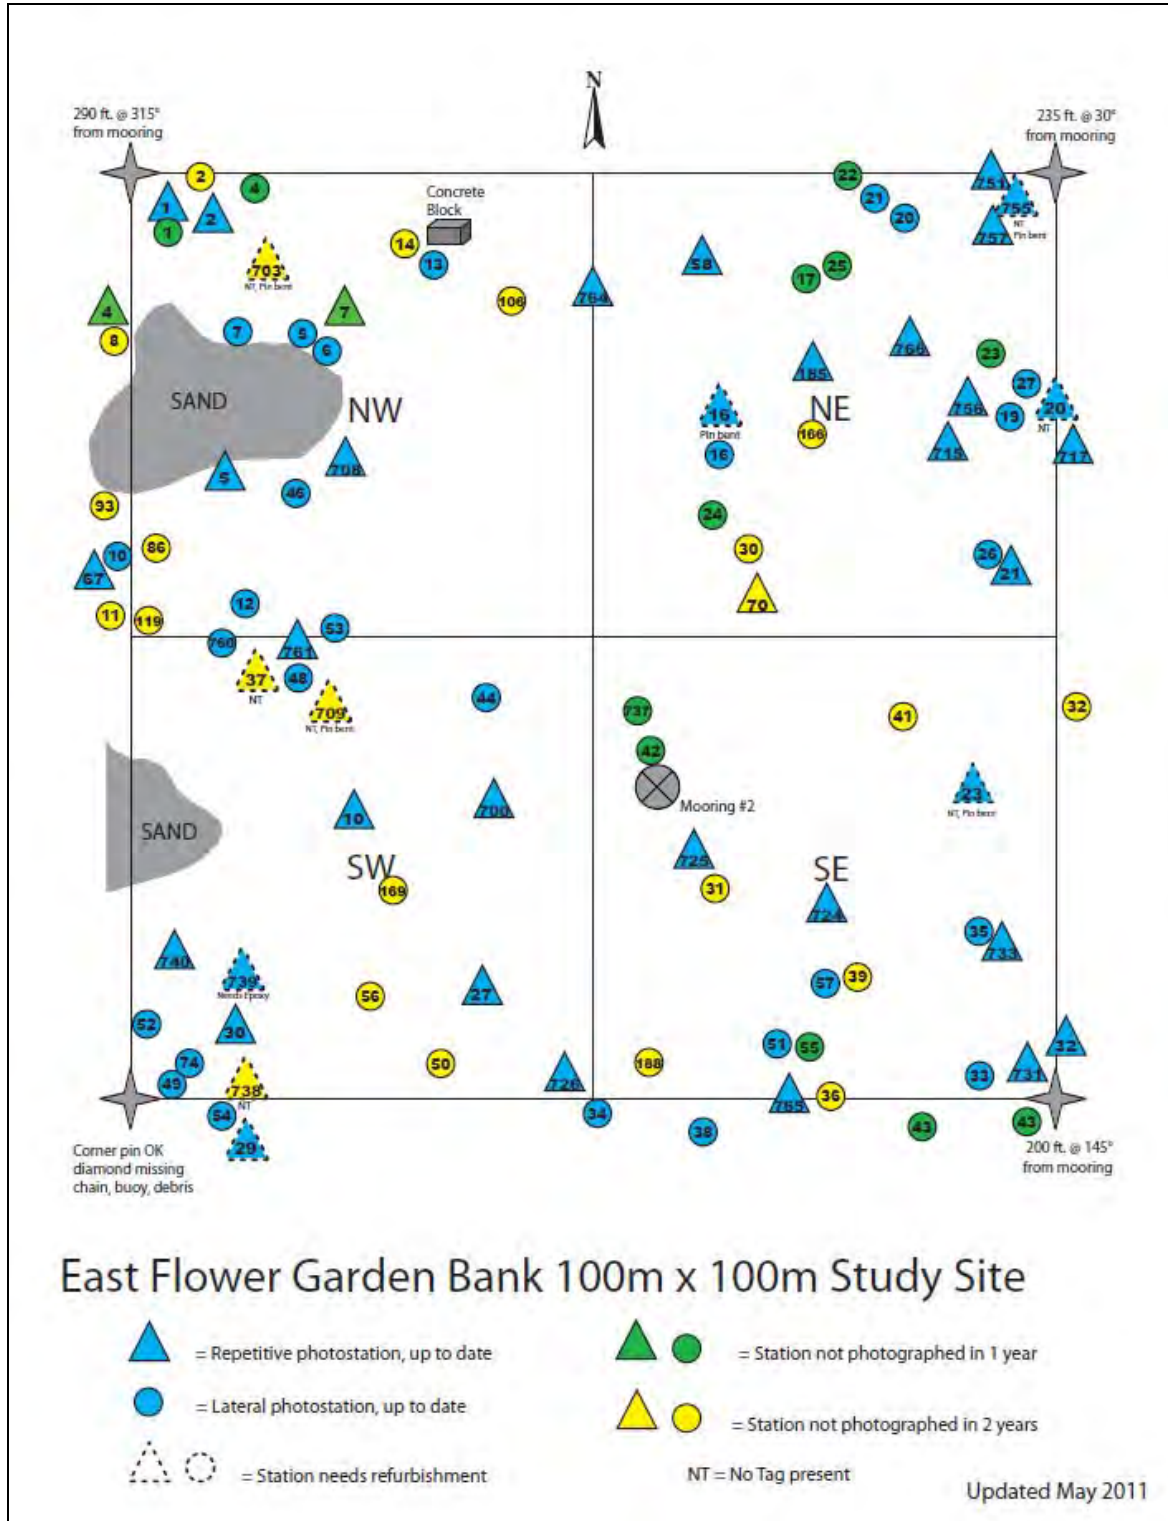

- Drilling into, dredging or otherwise altering the seabed of the sanctuary; or constructing, placing or abandoning any structure, material or other matter on the seabed of the sanctuary.

(7) Fishing and Related Activities. The following activities are generally prohibited:

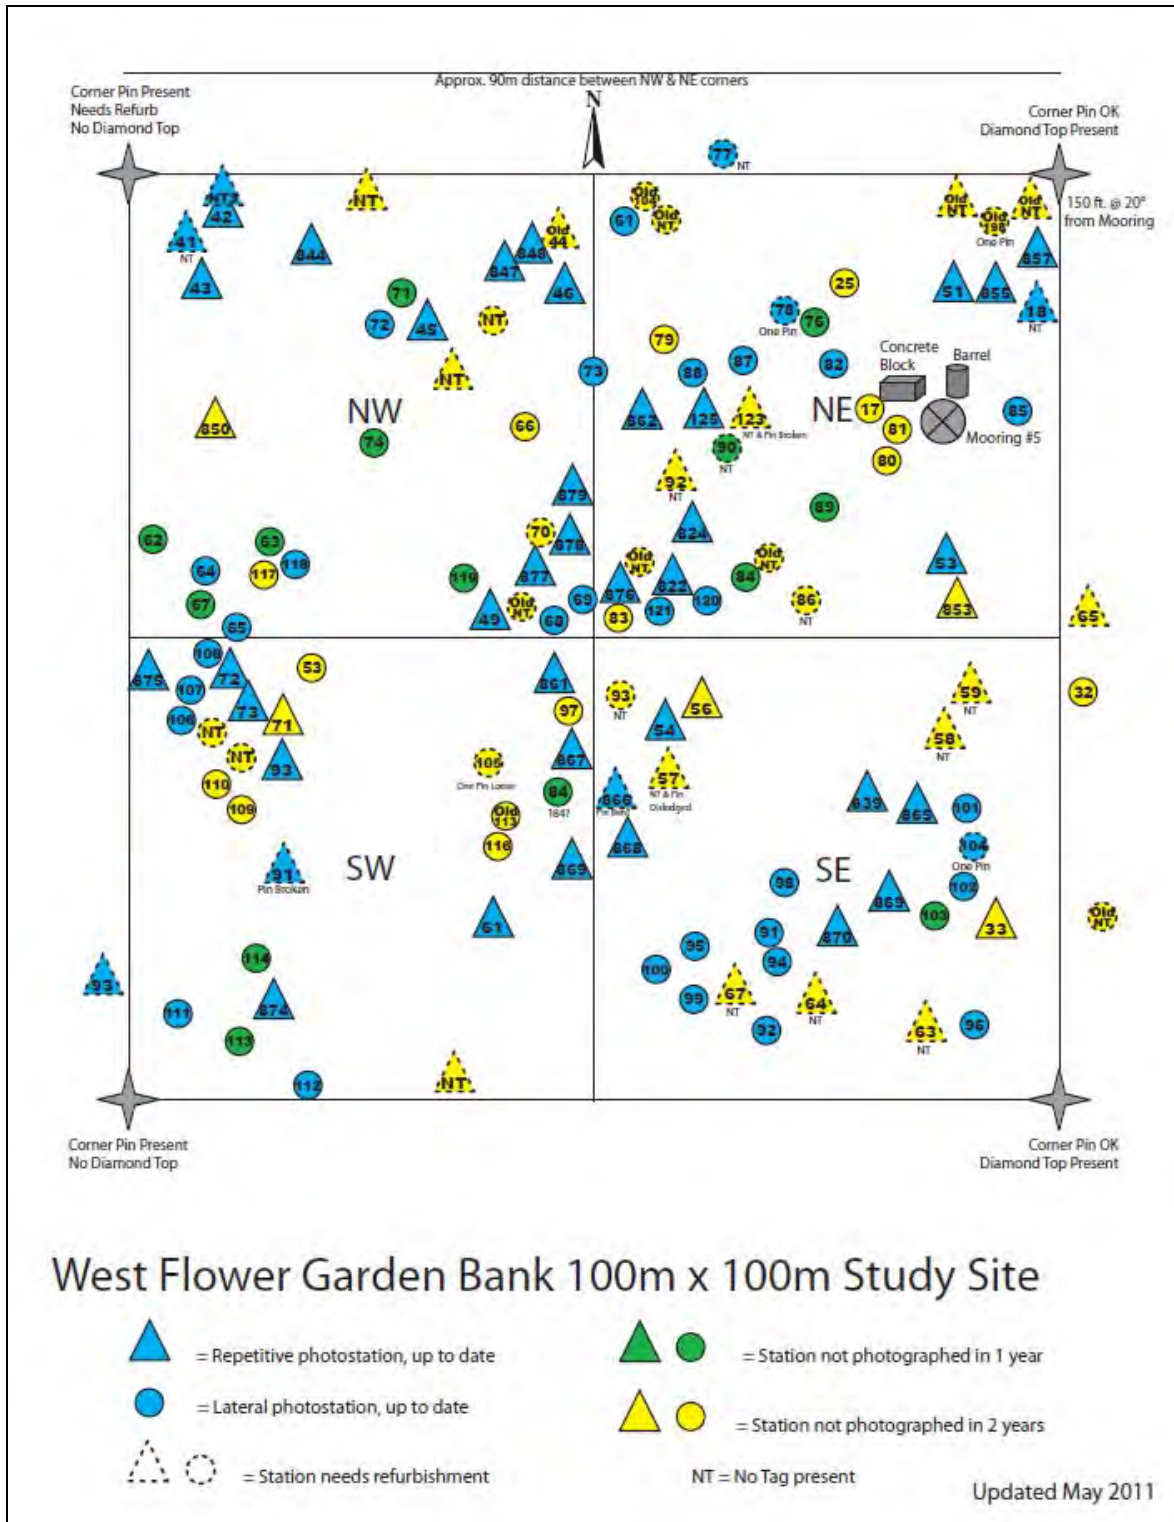

- Injuring, catching, harvesting, collecting or feeding, or attempting to injure, catch, harvest, collect or feed, any fish within the sanctuary by use of any gear, device, equipment or means (e.g. spear gun, nets) except by use of conventional hook and line gear.
- Possessing (except while passing through the sanctuary without interruption) any fishing gear, device, equipment or means except conventional hook and line gear.
- Possessing, or using explosives or releasing electrical charges within the sanctuary.

The Department of the Interior Mission

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the sound use of our land and water resources; protecting our fish, wildlife, and biological diversity; preserving the environmental and cultural values of our national parks and historical places; and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to ensure that their development is in the best interests of all our people by encouraging stewardship and citizen participation in their care. The Department also has a major responsibility for American Indian reservation communities and for people who live in island communities.

The Bureau of Ocean Energy Management Mission

The Bureau of Ocean Energy Management (BOEM) promotes energy independence, environmental protection, and economic development through responsible, science-based management of offshore conventional and renewable energy.
